A TREATISE ON
Nature's Sovereign Remedials,
ECLECTIC FLUID COMPOUNDS.

EXTRACTED FROM PLANTS.

HUMANIZED ELECTRICITY & MAGNETISM,
The Life Fluid and Life Food.

A New Era has Dawned on Suffering Humanity!

WILLIAM R. PRINCE,

Author of the Treatises on Horticulture, on Fruits, on the Vine
and on the Rose, and of numerous Articles in the Transac-
tions of the American Institute, and of the National Po-
mological Society, and in the National Agricultural
Reports, Member of various European and
American Agricultural and Horticul-
tural Societies, Member of the
American Institute, and of
the National Pomolo-
gical Society.

Also,

CORRESPONDING MEMBER OF THE ECLECTIC MEDICAL SOCIETY OF THE
STATE OF NEW-YORK.

He who shuns investigation, imprisons his mind in the region of gloom and darkness.—PRINCE.

This Pamphlet and the subsequent Editions, explanatory of NATURE'S SOVEREIGN REME-
DIALS for the various Diseases, will be mailed to Applicants. Price, One Dime, with Post-
age Stamp.

NOTE.—Flushing is 30 Minutes from New-York by the 34th Street Ferry.

 All Medicinal Remedials are forwarded by Express or per Mail, as
herein stated.

Extracted from the Eclectic Medical Journal of Pennsylvania.

PHILADELPHIA, SEPTEMBER AND OCTOBER, 1864.

Published by the Faculty of the ECLECTIC MEDICAL COLLEGE OF PENNSYLVANIA.

"A Treatise on Concentrated Remedials, by William R. Prince, Flushing, L. I., New-York, 1864.

This Treatise comprises Eighty Eclectic Concentrated Remedials not perfected heretofore by Physicians. Wm. R. Prince has devoted his entire life to the study and elucidation of the Medicinal virtues of Trees and Plants, and made some wonderful discoveries of their Therapeutic powers, and now has given the Scientific world the benefit of his discoveries. We would call on all Eclectic physicians to try these Remedies, as they are the result of the analyses of a scientific and philanthropic mind. They are designated as 'Nature's Sovereign Remedials for Diseases,' and from letters received from various sources, we are ready to pronounce them as pre-eminently worthy of the attention of inquiring minds."

GENERAL INSTRUCTIONS FOR NATURE'S SOVEREIGN REMEDIALS, ECLECTIC FLUID COMPOUNDS, EXTRACTED FROM PLANTS.

The usual idea of an Agency is a Depot where the Articles (Medicines or otherwise) can be obtained without recourse to the Principal Establishment. No such Agencies have been established for these Remedials.

Possessing, as they do, Therapeutic properties far transcending any Remedials hitherto presented to man, their great recuperative powers combine such positive virtues that no waste can be allowed. They will, therefore, not be sent abroad in any case, *for sale*, and will only be sent when *actually sold*. We will furnish each applicant, and especially every person afflicted with Inherited Scrofulous or other Disease, who has been abandoned as hopeless, with a copy of our Treatise—from which each one can select such Medicines as may be deemed best suited to his case, and apply therefor, direct to us. Probably some may give their Diagnoses, and desire that the selection of Medicines may be made by us, and will instruct us accordingly. On receipt of their orders, we will forward the Articles desired, with ample Directions, by Express, to their destination. Payment can be made by a Remittance with the order, or by a Bill sent by the Express, collectable on delivery of the package at its destination.

Post-Office Orders and Checks or Drafts are the safest means of Remittance by applicants for Medicines.

Druggists and Physicians.—With them very liberal arrangements will be made for furnishing all regular supplies as wanted.

The Principal Diseases for which these Medicines are Remedials, are the following: All Inherited and other Scrofulous Diseases, Consumption, Bronchitis, Erysipelas, Salt Rheum, Psoriasis or Tetters, Scurvy, Leprosy, and other Skin Eruptions, White Swelling, Hip Complaint, Swelled Joints, Caries or Bone Scrofula, Inflamed Periosteum and Iris, Scrofulous Rheumatism, Strumous Ophthalmia, Bronchocele or Wen, Glandular Swellings and Indurations, Cancers, Cancerous and other Humors, Tumors, Ulcers, Boils, Fistula, Piles of both kinds, Head, Ear and Nose Discharges, Irritation of the Spine, Hydrocephalus or Dropsy of the Head or Brain, Softening of the Brain, General Dropsy and Ascites or Dropsy of the Abdomen, Diabetes, Bright's Kidney Disease, Atrophy or Marasmus or Emaciation, Scald Head, Pneumonia or Inflammation of the Lungs, Inflammation of the Stomach, Catarrh, both incipient and Chronic, which is the preliminary to Consumption, and incurable by all the Remedies of the Faculty; Laryngitis or Throat Ail, Polypus of the Nose and elsewhere, Croup, Asthma, Diptheria, Jaundice; also, all other Diseases of the Liver, Lungs, Throat, Heart, Spleen, Kidneys, Stomach, Membranes, Ovaries, Uterus and Glands; Epilepsy and other Fits, Chorea or St. Vitus' Dance, Sciatica, Rheumatism of all phases, Gout, Constipation or Costiveness, Dyspepsia, Diarrhoea, Dysentery, Cholera Morbus, Typhoid, Bilious, Spotted and other Fevers, Fever and Ague, Bilious Colic, Arterial Excitement, Hemorrhage, Gravel and Stone, Small Pox, Varioloid, Blotches, Freckles, Moth Patches, Ring Worms, Neuralgia, Salivation, Tape, Pin and other Worms, Spermatorrhoea or Involuntary Emissions, Nervous and General Debility and Prostration, Incontinence, Stricture, Prostrate Gland, Varicocele, Hydrocele, Gonorrhoea, Leucorrhoea, Chlorosis, Amenorrhoea, Dysmenorrhoea, Menorrhagia, Prolapsus Uteri and the various Affections of the Womb, and other Female Diseases. Also all other Sexual, Nervous, Seminal, Eruptive, Urethral, and Urinary Affections.

They are the most efficient Remedies for every phase of Syphilitical, Mercurial and other Mineral and Drug Diseases, and their complications, as well as for every phase of Scrofula and for various other maladies. Among these Remedials there are three which possess the sublimated virtue of Mercurializing the Human System or extirpating all previously existent Diseases, without salivation or the substitution of any new Disease, as is the case with all the 54 complications of Calomel or Mercury, and which will, by their purifying and transcendental Therapeutic powers, not only cure the Diseases and recuperate the constitution, where the Ancient Medical Practice has proven utterly powerless, but will eradicate from the system every impurity and taint of the blood, be it inherited or acquired.

If a full Diagnosis of any invalid is sent to us, we will prescribe an appropriate Remedy, without charge. If our friendly correspondents will send us the names of any severely afflicted persons and of their diseases, we will send them our explanatory Circulars.

The Fluid Medicines are in Bottles at \$3 and \$5 each, and the Powdered Roots are in Boxes at same rates. Treble Extract of Scrofularia is in \$5 and \$8 bottles. All are accompanied with Directions as to doses and quantities.

WM. R. PRINCE.

PRINCE & CO., Proprietors of the *Linnaean Nurseries and Gardens*, Flushing, Long Island, opposite to the City of New-York, will send Catalogues of any of the Departments when desired, on receipt of a red postage stamp for each one of the six that may be applied for.

N.B.—The Largest Assortment of Fruit and Ornamental Trees, Shrubs and Plants, of every class, and especially of Grapes, Strawberries, Raspberries, Currants and other Small Fruits, in the Union. Assortments of Shrubbery, Roses and Flowering Plants suitable for decorating Cemetery Lots, at 10, \$15 and \$20.

NATURE'S SOVEREIGN REMEDIALS

ECLECTIC FLUID COMPOUNDS,

EXTRACTED FROM PLANTS.

WILLIAM R. PRINCE, Flushing, Long Island, N. Y., having devoted his entire life to the study of Trees and Plants, which has ever constituted his innate soul-love; and having analyzed their Medical Virtues, has selected from the vast Vegetable Kingdom, *The most Potent Medical Species of Plants*, as pre-eminently worthy of being entitled,

GOD AND NATURE'S SOVEREIGN REMEDIALS FOR DISEASES.

In the pursuit of these highly interesting investigations, to which his grandfather, *William Prince*, who founded the Flushing Nurseries in 1732, and his father, of the same name, so long known for his Pomological Writings, had devoted much attention, he has been cheered by the gratifying consummation of a purpose which they had auspiciously commenced, and which was by them, as by himself, deemed a paramount duty to humanity.

Conscious, most fully, of the great responsibility assumed, we have prepared *Eclectic Fluid Compounds*, and formed combinations, such as we have deemed must prove most effective, in the eradication of the direful Diseases attached to Humanity; and, from the many tests to which these have been subjected to prove effectually their Specific characters as Therapeutic agents, and the numerous successful results thus obtained, we feel assured that we may make the declaration to the World, that *There is no Disease connected with our Race for which a Natural Remedy may not be found existent in the Vegetable Kingdom.*

We, therefore, assume, as the result of our labors and experience, that we may almost invariably guarantee a cure for any Disease, where the patient still retains sufficient constitutional vitality for healthful recuperation.

Hitherto, physicians, even the most eminent, have adopted and promulgated the now disproven fallacy, that Scrofula, and other inherited diseases, cannot be eradicated; and they have in consequence prescribed merely for the *Symptoms*, without penetrating and annihilating the *Causes of the Diseases*. Hence, a perfect cure has been with them an impossibility, and they have furnished only palliative or temporary relief. It would appear, to a reflective mind, a most inexcusably omissive anomaly in Nature, which seems to have provided a remedial for every other disease, if she had omitted to provide for *Scrofula* with its Hydra heads, the most universal and baneful of all diseases; and more especially when we consider that the innocent are so frequently suffering for the errors of their ancestors. My mind, when contemplating the wisdom, order, love and harmony, which are so strikingly and beneficently demonstrated in the universal providence of God and Nature, has culminated in the adoption of the solution, *that every human malady has its natural remedy, it only requires man's energies to search them out.*

Having received numerous proffers of Association, tendered me by Physicians and Institutions, which presented great pecuniary advantages, I have declined to accept any, having on my part but one single purpose in view, and fearing that distracted councils might retard the development of that object. I have, therefore, without hesitation, declined them all, although at my age (now 68 years) I would otherwise have gladly accepted some associate aid. I, therefore, now present myself to my Countrymen and to the World, standing alone! and claiming public confidence solely on the broad basis of *Eternal Truth!* We now unfurl Reason's Hygienic Banner to the World, inscribed with the bright and auspicious Insignia:

GOD AND NATURE'S SOVEREIGN REMEDIALS.

which they, through Divine wisdom, have placed in the Vegetable Kingdom as Antidotes and Correctives to all the Maladies afflictively connected with Humanity. We thus announce a *New Era to the Human Family*—a banishment of the blinded delusions which, for countless ages, have enshrouded Medical Practice, and an entire abandonment of all Mineral prescriptions for Diseases as utterly poisonous to the Human system; and we do ardently demand the universal adoption of Vegetable Remedials—of Remedials derived from that Kingdom, which is presented to us as a sublimated and spiritualized development, emanating from and rising far above the Mineral Kingdom. The *Sovereign Remedials* which we now offer, have been presented gratuitously to the Professors of the New-York Medical College, to the Female Medical College, to the Homœopathic College, and to Dr. Stephen R. Kirby, the distinguished President of the Homœopathic Society, to the Physicians of Bellevue Hospital and the numerous Asylums, to the Physicians of the American Institute, and to many private Professors, and they have been distributed to the poor at every opportunity that has been presented.

APR 10 1924

It is, to the reflective mind, a subject of extreme amazement, that, even at this day, after such a vast concourse of Medical Professors have, for scores of centuries, devoted themselves to the healing art, and enunciated the mightiest professions of their discoveries; they are still unable to present us with radical remedials for any of the *Inherited Diseases* connected with our race, such as Scrofula and its many direful phases, Consumption, Syphilis, Cancer, Diabetes, or even for the Mercurial Diseases which they have entailed upon humanity by their own erroneous practice.

They universally admit the astounding fact of their inability to cure or eradicate the whole chain of Diseases which, by transmission from our progenitors, have now become constitutional. To the most baneful of all Sexual Diseases, they have applied Mercury as the sole Remedial, which has proven to be quite as direful and hereditary a curse as the pre-existent disease it was intended to cure.

As Dr. McClintock and others have declared, "Mercury (Calomel) has made more cripples than all wars combined."

Dr. Warren, in his great work, when speaking of Syphilis and Scrofula, as inherited diseases, thus avers: "It is a well-grounded fact, that a system once pervaded by the poison of these diseases is never completely purged of them, but they find expression in the Lupus, Eruptions, Scaly Affections, and other Maladies of future generations."

This deplorable result of all their prolonged researches after Medical and Hygienic knowledge, has arisen from their ever continuing to blindly probe the Mineral Kingdom for a sovereign panacea, whilst utterly regardless until recently, of the higher claims to development presented everywhere by the Vegetable Kingdom.

I will here remark that the labors of a true Eclectic Physician, who prescribes only the recuperative and purifying Remedials which Nature presents, finds his principal obstacles not in the many Diseases which afflict humanity, but in the numerous corrupted complications of these Diseases, where, combined with Mercury, Arsenic, Antimony, Sulphate of Zinc, Nitre, Salts of Iron, and Iron itself, and with other Mineral poisons, and even with Vegetable poisons, such as Cinchona, (Quinine,) which breaks the constitution, and has produced blindness and insanity, Copaiva, Strychnine, Cannabis Indica, a narcotic drug—the Haschish or Gunjah of India, and other Tropical drugs utterly destructive to health in northern climates. The Supreme Court of Constantinople has prohibited the use of this Haschish, formerly much smoked there, and yet this deadly narcotic has been urged upon our citizens by a pretended M. D., of Broadway, New-York.

Indeed, Mercury or Quicksilver, known also as Calomel, and the Nitrate of Silver, Sulphate of Silver, and several other poisonous Minerals, are used by physicians in so many phases and admixtures, that thousands swallow them without the least knowledge of the fact; and although they are prompt palliatives in many diseases, so fatal is their poisonous influence to all health, that in most cases there can be no approach towards recovery until every particle of these deadly poisons are expelled from the system. I notice also an announcement of a "Syrup," which is said to cure Paralysis and similar diseases. This is another gross deception, as no Medicine can influence Paralysis, &c. It may be most positively averred that the Diseases which are created and deposited in the system by deleterious Drugs, and by Calomel (Mercury) and other poisonous Mineral substances, present complications much more difficult to be counteracted and eradicated than any of the original Diseases. In fact, we have found them to be the only intractable cases, where our Vegetable Remedials would not prove promptly effective. But after assiduous analyses and experiments, these are now made to yield to powerful antidotes judiciously selected.

It is the mystic ignorance and delusion which have hitherto enshrouded Medical practice and the unnatural maltreatment of diseases by Diplomatized Agents of Death, that have raised the Mountain of Misery and human Degradation, which we are now called upon to remove and wash away by the most arduous Herculean labors, and by the ardent exercise of Eclectic Light.

I now announce as my prerogative, and my position, and as the basis of my demand for the recognition of the superior claims of the Vegetable Kingdom to all the Therapeutic powers appropriate to the Human Family, that it is every where presented to us as a progressive emanation from and a sublimated and spiritualized development of the Mineral Kingdom, fraught with higher, mightier and more congenial purposes to our race; all its ingredients purified, alimentary, hygienic, and constitutionally adapted to the sustenance, comfort, unfoldment and increase of the Human Family. And in connection with this vast and regenerated arrangement of Man's Progressive Destiny, we hail, as an all-glorious perfective attendant on the dissemination of races over the wide-spread and divergent climes of Earth, this great and pregnant normal fact, that God and Nature, in their munificent Providence for the welfare of humanity, have planted in each distinct region, not only Grains, and Fruits, and Vegetables most appropriate to human sustenance, but that they have also, with ever-watchful benevolence, placed in each distinct region a distinct local Medical Flora, with healing virtues especially adapted to the various diseases which are peculiar to that same section of our globe.

And I may here mention, as a connecting fact of momentous importance, that the Medicinal Remedials of any one country are not equally suited to the similar diseases of other countries, but forfeit their special applicability by transmission, as is the case with Cinchona or Quinine, when used in northern climates, where it has proven destructive to the constitution, and has in some cases produced blindness and insanity. The importation of foreign Drugs for our domestic maladies, is not only rebuked by Nature, but is the fruitful source of other Diseases which are generated by their incongenial influence.

I claim for the Vegetable Kingdom, a potent ascendancy and a controlling influence above the Mineral Kingdom, derived from its higher, and purer, and more progressed and spiritualized development, thus presenting powers which Man may exercise, for highly useful and even for Hygienic purposes. As Minerals were not given to Man for food and sustenance, and as Vegetables were so given, it is a fair deduction, that any application or absorption of the former into the human system is contrary to the Law of our Being; whereas the Vegetable Kingdom having been prepared, assimilated and constitutionally adapted to the wants of Man, it is there, and there only, that he must look for all the requirements congenial to his Nature. And, as a striking illustration of these truisms, we find in the Vegetable Kingdom every mineral that is existent in the human system, not in the crude state of ordinary Mineral formations, but compounded, elaborated, sublimated and purified for assimilation with the human system. And in correlative connection we may also note the pregnant fact that Iron, the Mineral which predom-

ates in the constitution of Man, is also the predominating Mineral in the Vegetables which comprise his nutriment. There is no Mineral, whose influence upon the Human system cannot be met by a Vegetable Agent, that will impart the same influence.

And I will here proclaim the most triumphant manifestation now first revealed to Man, that there exists an inherent power in the sublimated and purified Vegetable Kingdom combined with its relations to humanity, far transcending all the powers of the Mineral Kingdom, and which is demonstrated to us, by the all-pregnant fact, that Vegetable Antidotes have the power of neutralizing all the potent influences of Minerals on the human system, and even of entirely eradicating the baneful Mineral poisons which have become deposited therein by their pernicious application as medicines or otherwise; and that even Mercury itself can be entirely extirpated from the human body. This all-important and momentous fact, solves, at last, the question as to the sanative power capable of eradicating the misery, pain and anguish, which have been hitherto entailed upon mankind by the destructive and criminal use of Mercury as a Remedial, under the name of Calomel, and under the other various names and devices which physicians and empirics have adopted to cover up and conceal a palliative poison, one which has so long afflicted our race with the direst and most inveterate diseases, and has proven itself the greatest scourge that has ever befallen suffering and deluded humanity.

If there is a noble and God-like object, pre-eminent above all others in foreshadowing its blessings to the human family, and which calls most potently for new light and reformation, it is in the vast barren field of past and present Medical practice, whence the shrieks of myriads of the afflicted and the dying, send forth their implorations in vain for relief at the hands of too many unskilful practitioners. He who shall rescue Humanity from this labyrinth of pretentious ignorance, sophistry and delusion—from this malpractice of ages against the normal recuperative powers of the human constitution—will be well entitled to a crystalized monument from posterity redeemed.

The Hereditary Diseases which have descended to us, through the countless ages of the past, have been transmitted by *Sexual Corruption of the Blood!* resulting originally from the impure habits and vices of our ancestors.

Venereal Syphilis! and not *Psora*, is the *Corrupt Parent of all Inherited Diseases!* and Hahnemann, the mighty reformer and discoverer of one great fundamental truth, failed in this, for *Psora* is but one of the phases of original Siphilitic Scrofula!

Physiological Incompatibility in the marriage relation, as Professor Powell justly remarks, results in sterility or in generating imbecility of body or mind or of both, and may truly be deemed the prolific parent of countless abnormal conditions, thus entailing disease and misery on our race; but the Professor errs greatly when assuming that it is also the parent of all Scrofulous Diseases, as their parentage was generated under contrary influences. Nevertheless, latent Inherited Scrofula may be developed by marital impotence and defection.

Scrofula! with its seven-fold Hydra heads! combining more than fifty phases and names, is the representative scourge of the Nations, bearing in its train the hereditary corruptions which have been transmitted and filtered through countless generations down to us.

Human Impotence! blinded by its own errors, and beclouded by its own perversions and misconceptions, seeks to add to this Bane of Humanity, a new scourge to afflict each rising generation, by Scrofulous Vaccination from our cattle and horses; and the healthy infant is life-blighted by infectious Vaccine matter, through the ignorance of confiding parents, and the imbecility of professing benefactors, who thus aggravate and develop the virulence of the primitive taint, which would otherwise have remained passive in the human system.

Inherited Scrofula will often remain dormant in the system from birth to manhood, and frequently until a still later period of life, the normal vigor during the growth counteracting its influence; and it will then develop itself wherever the system has become weakened, in one of its countless phases, or by increasing the virulence of some local disease. But Vaccination of a child, born with a Scrofulous taint, usually results in an early eruptive disease and premature death, or in a life of misery, pain and corruption.

It is these *hitherto Incurable Maladies*, in regard to which we now declare it to be *Our Prerogative*—sustained by our investigations and discoveries, to announce—that we possess the knowledge and the power by the application of *Nature's Bounteous Restoratives*, to absolutely extirpate these Tainted Diseases, these contaminations of our race, and to *restore the blood of the adult to the purity of that of the infant*. There are no diseases, however prolonged may have been their existence, whether generated by inheritance, or resulting from recent absorption into the system, which cannot be made to yield their virulence to the operative power of the Sovereign Specifics which we are now enabled to apply to them. It is true, that in inherited and long existing and obstinate cases, where the whole system has become contaminated by corruptions of the blood, and entirely saturated with the disease, the patients will necessarily require a prolonged course of treatment to eradicate permanently this life-long constitutional taint, to attain which, the medicine has necessarily to permeate and purify every portion and fibre of the entire system. But as Nature's Remedials influence gradually and harmoniously the entire animal economy, the whole operation will be of a mild and relaxing character, until the system shall have attained a perfect state of purity and health. It cannot be expected that these diseases can be removed under periods varying from three to four, up to six months, and in the severer cases, where the patients have attained mature or old age, the period even of ten or twelve months may be required. But this delay need not present any discouragement, as the final successful result, although deferred, will be equally assured.

We feel that we have a right to sustain our "*Prerogative*" to the Discovery of these *New Inestimable Remedials*, and we here assert that the Sovereign Vegetable Specifics we now announce as *Positive Cures* for *Scrofula of all phases, Consumption, Syphilis, Mercury, Cancer, Incipient Diabetes, and all Kidney and Liver Diseases*, originated with us, and are unknown to the Medical Faculty; and, furthermore, that these are the only Remedials which will entirely eradicate these direful and wide-spread Diseases.

It should be a most gratifying consideration to patients that the Medicinal Plants now presented, are *Nature's Gracious Restoratives*, perfectly innocent in their character, and such as God and Nature, in their beneficence, have allotted us. They, in their ever-provident wisdom and benevolence, bid no man to despair who adopts appropriate Remedials, for *Nature is ever true to herself*, and she will not fail to avail herself of their Therapeutic virtues, by the specific adaptation of every plant possessing remedial powers; thus ever exercising her recuperative energies towards the resumption of her normal prerogatives of purity and health.

We cannot withhold the expression of our firm conviction, that these *Vegetable Remedial Extracts* must take precedence of all other Remedials that have been hitherto adopted by man, and that their present introduction cannot fail to result in a *Complete Revolution in all Hygienic practice*.

If we have assumed some New and Momentous Positions, and now enunciate for the first time some Mighty Truths startling to the expiring regime of Ancient Medical Orthodoxy; we do trust they will not be repudiated because they are novel innovations, but that they may be accepted as conclusive and gratifying evidence, that the ages of darkness and delusion are past, and that the effulgent Electrical Light which now illumines the Mental as well as the Physical Universe, proves to us in a two-fold sense, that "The World still moves," and that it will ever continue its revolutions of beneficent and benign progress in the revealment of Eternal Truths to Man.

Animated solely with sentiments of devotion and usefulness to our Race, and to the mighty cause of Human Progress, we hail as a bright and most cheering omen, the gratifying fact that many Professors and Physicians, possessing the highest Medical attainments, which they have been enabled to derive from the existent Colleges, have thrown off the prejudices and shackles of their circumscribed education, and have, in a greater or less degree, assumed the same views as ourselves, by the adoption of Vegetable Remedials in their general practice. The recent investigations made by the Eclectic Medical Societies; by Prof. Stephen R. Kirby, President of the Homœopathic Society; by Prof. Samuel R. Percy, of the New York Medical College, and by other eminent practitioners, as to the active Medical Agents found in Veratrum, Hammamelis, Gelseminum, Podophyllum, Cimicifuga, and other Plants and Trees, by careful analyses and subsequent practice, cannot fail to shed new and brighter light as to the Therapeutic powers, which have been hitherto allowed to remain dormant and useless in the Vegetable Domain. And as it is now realized that all the Minerals combined with the human system, find a coeval existence in the Vegetable Kingdom, whose products have been specially prepared as nutriment for Man; we surely have no further need to look abroad for the Remedial Agents which God and Nature have placed here most providentially for the special necessities of the Human Family.

The Physicians who have so liberally applied to us for our Specific Medicines, have expressed themselves as highly gratified with the progress and with the results, and are greatly extending their adoption of them in their practice. We now solicit a correspondence with all those who have hitherto confined their approval to the ancient regime, and to the existing Materia Medica, with an aversion to innovations; in order that we may be enabled to place before their view, the enlightened arguments and the positive evidences, that the progress and triumph of the Hygienic Art and of universal Medical Science, can only be attained by the general adoption of Vegetable Remedials.

We can here assure all who appreciate truthfulness, that Nature's Sovereign Remedials which we now offer, are the most reliable Specifics which have ever been revealed to and adopted by man; and candor renders it our duty to say, that their appropriate usefulness is based, in an eminent degree, on the great Homœopathic Doctrine, which stands as one of NATURE'S AXIOMS; and that our present application of its fundamental truths exclusively to the Vegetable Kingdom, with an entire rejection of the Mineral Kingdom, is a progressive scientific outgrowth, far transcending the original views of Hahnemann's Organum, and the practice hitherto assumed by his Votaries.

We wish it fully understood that in the preparation of our Remedials we use only the pure Fluid Extracts, and that we reject Minerals of every kind. Even Iron, and all preparations of it, we know to be positively injurious unless taken after it is elaborated and purified for assimilation in the Vegetable Kingdom. We also reject all Narcotic Drugs, and Morphine, Opium, Laudanum, Balsam Copaiva, Sulphate of Potassium and other deleterious preparations. Prussic Acid and Spirits of Nitre we reject *in toto*. Sarsaparilla we have proven to be valueless. Cod Liver Oil fattens but has no curative power, and imparts no strength or real benefit. Even Potash fails in nine cases out of ten, and Iodine as prepared by Druggists, loses, mainly, its virtue. The insane idea that Man can prepare "Blood Food" for the human system, better assimilated and more congenial thereto than God and Nature have done, can only have been generated by mental inanition.

Physicians have so often quoted and so widely endorsed and adopted in their practice the fatal remark made by *Laennec*, that "Nature's efforts towards effecting a cure are injurious and those of Art are useless," that its assumption has been the great bane which has so long arrested Medical advancement. Nature is, in herself, ever recuperative, and the most important point in Medical treatment, is to allow the fullest operation of all her vitalizing and revivifying powers. Medicine in many maladies, and especially with infants, children, and weakly persons would, if applied, be a curse, and tend to arrest and blight the normal and health-restoring influences of the human system. The cardinal doctrine, therefore, is this: give as little Medicine as possible, and barely enough, at any time, to aid the operation of Nature. Medicines are found to exercise more influence in permeating the human system during the period of our sleeping than in our wakeful hours, the mind being then quiescent; and this result is for the simple reason, that Nature, in whose aid we take the medicine, pursues then her normal course unimpeded by counteracting influences.

Hahnemann preferred vacations in taking Medicine, as he ascertained by experience, that many medicines continued to operate on the system for a period sometimes exceeding thirty days after they had been swallowed. This fact is specially applicable to Nature's Vegetable Remedials, and the Scrofularia, Veronica, Mercurialis, Pneumonica, Urinaria and some other Medicines continue to effectually purify the system for months after they are taken into the body.

ECLECTIC SPECIFIC REMEDIALS.

FLUID EXTRACTS FROM PLANTS.

1—*Scrofularia*.—This Potent Remedial possesses the most renovating and recuperative powers. It eradicates all Inherited and Recent Scrofulous Diseases of every phase—Leprosy, Erysipelas, Salt Rheum, Glandular Swellings and Indurations, White Swellings, Hip Disease, Cutaneous (Skin) Eruptions, Enlarged Tonsils and Inflammatory Internal Affections.

It acts energetically on the Liver, removes torpidity, restores its active functions, increases the Secretions and dispels every irregular affection of this primary organ, whose influence is so potent throughout the entire system. It is the only Positive and Unfailing Remedial, taken in connection with another Fluid Extract, possessing the property of counteracting salivation; which combines the requisite powers for the reconstruction and recuperation of the entire economy of the human constitution.

It operates as a most grateful tonic, expels every impurity and taint from the blood, and renovates the organic powers of the entire system.

"The Life is in the Blood."—*Bible*.

"As is the Blood, such is the Body and its Organs."—*Swedenborg*.

I claim for this Sovereign Eclectic Remedial, which combines the Hygienic virtues of three of the most purifying Medicinal plants, a Specific health restoring power for the Diseases I have named, such as is not possessed by any other recuperative agent yet known to man.

This potent *Purificator* furnishes Man at last with what has been so long sought for and so ardently hoped for, as the *Ne Plus Ultra* of Remedials—*Nature's Bequest—A Sovereign Eradicator!* of the direst Inherited Diseases which have descended to us through countless ages of corruption, and have thus become constitutional. It is to the all-pervading Love ever evinced by God and Nature, our primeval parents, that we are to render homage for having thus provided for us, these most appropriate and ample Remedies, to heal the fatal diseases which Man's own aberrations and corruptions have entailed upon his race.

As this *Great Remedial* completely scours out from the human system all Inherited Diseases, whose corruptions have been transmitted and filtered through many preceding generations, and has to absolutely reconstruct and replace a new and pure fabric in substitution of the corrupt and impaired one, where constitutional contamination had been perpetuated for ages, it will necessarily require a considerable time for its full accomplishment. Patients must, therefore, await with a contented mind, but with a surety of a favorable result. Some few cases have speedily presented favorable indications, and a few have been cured in two months, but most others have required three and four months, and very obdurate and long standing cases six, eight, ten, and twelve months. It is a characteristic of this Remedial, and of several others, that the symptoms of the disease are brought to the surface, which sometimes causes ignorant persons to suppose that the Medicine has increased the disease.

2—*Veronica Quinquefolia*.—This Medicine is totally distinct from the spurious Article fraudulently sold under this name by some charlatans in New-York. The supposed plant has been confused by some with *V. virginica* and *V. beccabunga*, whereas the growing plant, and the specimens presented to the American Institute, and to the New-York Medical College, prove them to be of very distinctive characters. The facts are thus: No legal right to any Medicine can be secured in the U. S. Courts under the *Scientific Name* of a Plant, that name being public property. It became necessary for this reason and for self-protection to propose an entirely *New Name*, and as there existed no plant under the name of *Veronica Quinquefolia*, this name was adopted for this Medicine, and secured accordingly in the U. S. Court. Judd, the Asinine Humbug Editor! (so styled)? of the *Agriculturist*, could not comprehend the facts, and attempted to explain them, but only evinced that natural stupidity and knavery which Nature has stamped upon his face. It purifies the system by the gradual expulsion of all corruptions from the blood during a continuous period of two to four and six months, and in long-existing and obdurate cases, or persons advanced in age, it sometimes requires eight to twelve months. It is efficacious in many phases of Scrofula and Scrofulous Ulcers; removes Tumors, heals old Fever Sores, Running Ulcers, Boils, Humors and Psora; removes Goitre or Wen, Tetters or Rash, Pimples and other Eruptions; cures King's Evil, Swelled Joints, Strumous Ophthalmia, Fistula, &c. It acts potently on the Kidneys, increasing the urine, and cleanses and purifies the bowels. This Remedial, like the preceding one, and some others, brings the disease from the interior to the surface, and the eruptions on the surface are consequently increased for a time, until they gradually pass off into the atmosphere.

3—*Mercurialis Herbacea—Anti-scorbutic*.—Reconstitutes the system, and renders permanent benefit by its constitutional adaptation; producing the same effects as Mercury, without any of the injurious effects of that pernicious and health-destroying Mineral. It will also neutralize the effect of Mercury, and other Mineral poisons, and will eradicate them entirely from the human system. This and other potent Remedials presented to us in the Vegetable Kingdom hold a triumphant sway over the entire Mineral Kingdom, by their more amplified, perfected and transcendental powers, derived from their higher, more pure, sublimated and spiritualized condition and development. This powerful Remedial constitutes a highly important auxiliary in eradicating the severest and most obstinate Scrofulous, Siphilitic and other Inherited Diseases, and Chronic Inflammation and Constipation of the Liver and Lungs.

4—*Consumption—Phthisis*.—For general prevalence and fatality this fell destroyer surpasses all others, and it takes from life untimely, and even in the prime of life, the brightest and the best. It is stated that one third of the Adult deaths are caused by this disease. A Remedy will therefore stand before all others in proportion to the magnitude of this insatiate pestilence. Pretenders on all sides claim to cure this disease, and yet we can nowhere witness their patients cured. This general failure in all Medical practice for centuries, proves that this Disease has been hitherto entirely misunderstood. I have searched in vain the great Medical Works, to find any ray of thought which traces this Disease to its origin and generating cause. Consumption, Tubercular and Bronchial, comprise one General Constitutional Disease, which has become entailed upon humanity by the same parent as Cancer—*Inherited Siphilitic Scrofula*! Consumption is *Scrofula of the Lungs*, and the tubercles within are correspondent to the Tumors and Eruptions without, which present themselves on the surface in other Scrofulous Diseases.

The phases in Individual cases differ so very widely, that whilst we exercise in our prescriptions a constant regard to the original and basal disease, we must necessarily be guided by the symptoms which special cases present, in order to insure a general success. We now take the initiative in regard to Consumptive Diseases, and on receiving a full Diagnosis in each case we will prescribe and forward our Remedials, and indicate the proper diet. We shall insist that the patient place himself entirely under our direction, and that he abstain from all other Medicines or treatment. In this and all debilitating Maladies we prescribe, in addition to the positive Remedial Medicines, a powerful Vitalizing Tonic to re-constitute the entire Alimentary and Digestive systems.

5—*Bronchitis, Acute and Chronic*.—These are phases of the General Disease, termed Consumption, and are equally fatal in their results. We prescribe distinct Remedials for the differing phases of this Malady.

6—*Pneumonia—Pulmonary or Lung Restorative*.—An Eclectic Fluid Compound from four Species of Plants, possessing remarkable powers, and combining Medical virtues of primary importance to Man. It will cure Incipient Bronchitis, Pneumonia and other Lung Diseases, Asthma or Phthisic, Croup, Catarrh, Constipation and Cyanosis.

7—*Urinaria*.—An Eclectic Diuretic Compound of great Remedial powers, and one of the most important to Females of all hitherto discovered. It combines the Fluid Extracts from eight Species of Plants. It acts promptly, and is far superior to Buchu in its beneficial influences upon the system. It may be justly deemed a Sovereign Specific for Diseases of the Urinary and Genital (Sexual) Organs, Kidney Diseases, Incipient Diabetes, Gravel, Prolapsus Uteri, and other Womb Maladies, Menorrhagia, Leucorrhea, regulates harmoniously the Catamenia, and other Female Affections.

8—*Cancer Eradicator*.—For Encephaloid and Scirrhus Cancers.—This direful Disease is one of the phases of *Inherited Siphilitic Scrofula*! and is, consequently, constitutional, and not local, as has been most irrationally supposed. The blood is permeated with poisonous animalculæ through the entire system, and no radical cure can be effected until these are exterminated, and the purity of the blood restored. No external application can be effectual, and the result will only prove temporary. Mineral applications, when brought in contact with the blood, impregnate the system with interminable disease. We employ Two Eclectic Vegetable Compounds of great power—the principal one to be applied internally, and the other in connection externally. These combined Remedials, it is believed, are the only reliable ones in Nature. Every other Remedy has been followed (with few, and perhaps no exceptions) by a renewal of the Cancer. Innocuous Tumors and Indurations are readily removed, and these are erroneously termed Cancers in many Certificates.

9—*Cancer of the Womb*.—This being a hidden disease, its cure is attended with many difficulties; but if prescribed for before the disease has progressed too far, we think our Internal Remedials and Injections, which possess great purifying powers, will effect a cure.

10—*Pulmonic Repressive*.—An Eclectic preparation for immediate suppression of violent Inflammation and Congestion of the Lungs, or of any important organ connected with the Arterial system. Its effect is powerful, and usually effective before other Medicines can be made to operate.

11—*Pilewort Compounds*.—Two Remedials for Bleeding and Blind Piles or Hemorrhoids, to be used internally and externally. External applications are usually only temporary, and an Internal Remedy is requisite to eradicate the cause. Relief from pain is usually prompt, resulting in a dispersion of the disease. We recognize an entire distinction between the incidental Piles of the Rectum, and Constitutional Piles, and we apply entirely distinct Remedials.

12—*Vitalizing Tonic*.—This Eclectic Compound possesses admirable virtues as a grateful beverage, invigorating to the stomach, and to all the alimentary organs, restorative of healthy digestion, and imparting strength to the entire system. It is especially recuperative to weak and debilitated constitutions, and to sustain the bodily strength when taking the powerful exhaustive medicines which are requisite for the eradication of Inherited Scrofulous Diseases, Cancer, Consumption, Dropsy, &c.

13—*Spotted Fever*.—A Positive Remedial for this severe Epidemic, which has been attended with unfailing success. It is also equally efficacious in the Typhoid phase which this Disease sometimes assumes. A recent invaluable discovery which is now becoming extensively used.

14—*Emesis Recuperative*.—An Antidote for Nausea, Sick Stomach, Loathing and Inclination to Vomit. These are the first symptoms of Spotted Fever and of some other phases of Fever.

15—*Arterial Sedative*.—For Organic Heart Disease, Palpitation of the Heart, Impeded or Excited Circulation, and Aneurism. A very powerful Remedial, possessing great harmonizing and tranquillizing influences.

16—*Inflammatory Rheumatism, or Gout*.—Having purified myself entirely, after eleven years' suffering from this one Disease with two names, I can prescribe a new Positive Remedial, to be taken internally. External applications are only temporary, and Colchicum, besides being transient in effect, is positively injurious to the system.

17—*Chronic Rheumatism*.—This is entirely distinct from the preceding Disease, both in its origin and general character. We have two Positive Remedials, one for Internal, and the other for External application, which have been used in numerous cases with entire success.

18—*Scrofulous or Venereal Rheumatism, Bone Pains, Bone Scrofula, Caries, Inflamed Periosteum and Inflammation of the Iris*.—Two powerful renovating Specifics, which penetrate to the basis of these severe Inherited Diseases, and will eradicate them, if they have not become incurable by neglect and delay.

19—*Renal Recuperative*.—For Diabetes, and Atrophy or Decay of the Kidneys. A new Remedial, deemed effectual in counteracting this Disease which Physicians have deemed incurable. We usually prescribe another Remedial, to be taken alternately. It is especially desired, that the prescription be applied in the incipient stages. It is fully believed, that Bright's Disease of the Kidneys, in its incipient stages, can be successfully counteracted by these two combined Remedials; and we are desirous to grapple with both these Diseases, which the Faculty have pronounced incurable.

20—*Chronic Diarrhea*.—A positive and prompt Remedial for this disease, and for Dysentery, Cholera Morbus and Weakness of Bowels. It has invariably proven successful.

21—*Children's Diarrhea at Teething*.—We have two Decoctions, which have proven eminently successful, one of which is to be used when they have additional colic pains.

22—*Eclectic Febrifuge—Anti-periodic*.—A powerful Remedial for Fever and Ague, Dumb Ague, and Intermittents. It arrests paroxysms, has proven effectual when Quinine has failed, and is far superior to it when treating the diseases of our own country.

23—*Febrile Eradicative*.—A Specific of recent discovery for Bilious Fevers. It has been applied with eminent success. It restores harmony to the digestive organs, and tranquillizes the entire system.

24—*Febrile Specific—Anti-periodic*.—A powerful Antidote for Intermittent Fevers especially of the Typhoid character, arrests paroxysms, regulates the digestion most favorably, promotes moderate perspiration, and increases cutaneous discharges. It is superior to Cinchona or Quinine, and has effected cures where that has failed, and, unlike that deleterious remedy, it does not affect the head and bowels unfavorably, nor injure the constitution, as that so frequently does.

25—*Gravellia*.—A Specific Remedial for the Gravel, Stone or Vesical Calculi, Dysmenorrhœa, and other Urinal Affections, and is very powerful and efficacious on the Female reproductive organs. In severe cases of Stone and Gravel, it is recommended to take this Medicine in connection with Urinaria, on intervening days. The result will be, the dissolving of the Gravel or Stone; and then, by using the Scrofularia, the system may be entirely purged from the Primary Disease which generated them.

26—*Diphtherica*.—A newly discovered Specific Remedial of great power, constringing the organic textures. It has proven eminently successful, taken internally, and also used as a gargle, in membranaceous Diphtheria, and in Canker and Ulcerations of the Throat and Mouth.

27—*Dropsy—General Dropsy*.—A Specific of great Remedial power. It removes the basis of the disease, and thereby eradicates it permanently. It acts promptly and gradually relieves the entire system, and has been attended with eminent success.

28—*Ascites, or Dropsy of the Abdomen*.—This differs, in some points, from the preceding. Two Remedials are prescribed, one as a purgative Diuretic, the other as a constant drink.

29—*Eclectic Resumptive*.—An Invigorating Remedial for Prolapsus Uteri, and for the reconstruction of Uterine powers and efficiencies.

30—*Eclectic Abative*.—A tranquillizing Compound for Epilepsy, Convulsions, Spasms, Cramps and Chorea or St. Vitus' Dance.

31—*Small Pox and Varioloid*.—A Sovereign Specific, which dissipates the poisonous influence of this Scrofulous disease, by its purifying powers. It has proven invariably successful.

32—*Chronic Constipation and Indigestion*.—An Eclectic Compound of great power, which has prove eminently successful in the most obdurate cases.

33—*Diuretic Compound*.—Highly beneficial to the Urinary Organs; for Scalding Urine in Gonorrhœa, Heat and Irritation of Genitals; inflammation of Kidneys and Bladder, and Suppression of Urine.

34—*Eclectic Relaxative*.—A Compound Remedial of great power for Amenorrhœa and Dysmenorrhœa.

35—*Ameliorating Laxative*.—Very efficacious in habitual Constipation, and for Piles when generated thereby. Also for obdurate Dyspepsy and other Affections of the Bowels; a Cathartic Remedial of great power

36—*Eclectic Constrictive*.—For Prolapsus Scrotum or Relaxed Genitals.

37—*Urinary Restorative*.—For Weakness and Chronic Affections of the Bladder and Kidneys, Urinal Incontinence, and Amenorrhœa, and Dysmenorrhœa.

38—*Eclectic Repressive*.—A Specific Compound for Menorrhagia, and for Uterine Hemorrhage.

39—*Dyspeptic Restoratives*.—This Malady results from various causes, and necessarily requires different Remedies. Three distinct Remedials are prescribed, in accordance with the origin and symptoms of this Malady. They operate harmoniously and successfully on the Alimentary and Digestive organs.

40—*Asthmatica Specifica*.—A potent Remedial for Spasmodic Asthma and Cough, Croup, Chronic Catarrh and Incipient Bronchitis.

41—*Eclectic Gargle*.—A highly estimable Remedial for Sore Throat, Enlarged Tonsils, Quinsy, Relaxed Uvula and Croup.

42—*Membranous Catarrh*.—An invaluable Specific for Catarrh, Inflammation of the Mucous Membranes of the Throat and Lungs, Hoarseness, Pneumonia and Renal (Kidney) Irritation.

43—*Varicocele Antidote*.—For Diseases of the Scrotum and Varicose Veins, Affections and Rupture of Testicles, Vesical Catarrh, White Swelling, and Inflammation of the Bladder, Kidneys and Membranes.

44—*Uterine Nervine*.—Anti-periodic—Alterative, operates specially on the Uterus and Female Diseases; possesses great influence over the Nervous system; efficacious and soothing in Nervous Debility, Chorea, and Periodical Convulsions.

45—*Sciatica Specifica*.—Applicable to the Sciatic Nervous region. Bathe the parts with it freely, and rub them thoroughly and frequently.

46—*Cerasine Tonic*.—Soothes Irritation and Debility of the Stomach and Nerves connected therewith, abates Hectic Fever, &c.

47—*Neuralgia Specific*.—For Nervous Debility, Neuralgic Soreness and Irritability of the Nerves. Severe Neuralgia requires Electrical treatment.

48—*Gravellious Diuretic*.—A very efficacious Specific for Gravel and other Calculous diseases. Has proven much superior to Buchu, and most other professed Remedies.

49—*Detergent Compound*.—Positive Specific for Scald Head, Ringworms, Blotches, Moth patches, Worms in the Skin, Barber's Itch, Dandruff, &c.

50—*Cephalic Nervine*.—Very efficacious for Nervous Irritation of the Head, and other parts of the system, Neuralgic pains, Watchfulness, Disturbed Sleep, &c.

51—*Congestion of the Spleen*.—A Specific for the Affections of this particular organ, which has been found very efficacious.

52—*Polypus Eradicative*.—This Specific dissipates the Chronic blood taint of the Membranes, by which this Disease is primarily generated.

53—*Icterine Antidote*.—A Positive Remedial for Jaundice or Yellow Skin. The skin frequently becomes of a saffron hue.

54—*Leonuri Nervine—Stomachic*.—Very efficacious in promoting the Catamenia, and for soothing Nervous Irritation, Sleeplessness, &c.

55—*Nervous Derangement*.—A very potent Antidote, soothing and quieting to the Nervous System, and usually prompt and effective.

56—*Specific Vermifuge*.—For Tape Worms and other Intestine Worms. Deemed very efficacious.

57—*Cryptogamic Vermifuge*.—A Sovereign Remedy for Tape Worms and for other Intestine Worms.

58—*Seat or Pin Worms*.—These require a distinct Remedial. We possess one which is new, and has proven very effective.

59—*Inebriation—Intemperance—Drunkenness*.—A Remedial which has often proven a cure, by causing a sickening aversion to Alcoholic drinks. But, in most cases, the Human will is the only controlling power.

60—*Delirium Tremens*.—Two Compound Remedials to be taken alternately, which have proven highly efficacious and successful.

61—*Tobacco Antidote*.—To be chewed as a Tobacco substitute. It has cured many inveterate Tobacco-chewers of this pernicious and empoisoning practice.

62—*Carbonaceous Powder and Fluid*.—Will arrest and prevent profuse expectoration, and a redundancy of phlegm.

63—*Hemorrhage of the Lungs*.—A Specific Compound for this obstinate disease, which has been attended with general success, when all other applications failed.

64—*Cephalic Restorative*.—A specific for Sick Headache, or Nervous Headache.

65—*Potential Nervine—Anti-Spasmodic*.—One of the best and most efficacious for Nervous Irritability, Hysteria, Vertigo and Convulsions during Pregnancy.

66—*Pucconia*.—Beneficial in Cancer Injection, in Pulmonary and Hepatic Affections, Typhoid Pneumonia, and other Lung Diseases. An active agent of powerful influence.

67—*Wombic Injection, No. 1*.—An astringent purifier, soothing and efficacious in Prolapsus of the Uterus, (Falling of the Womb,) and in Leucorrhœa.

68—*Wombic Injection, No. 2*.—For Congestion and Ulceration of the Uterus, and all Diseases of the Womb.

69—*Wombic Injection, No. 3*.—A soothing and healing application for Inflammation and Irritation of the Uterus, Vagina, &c.

70—*Chronic Eruptive*.—A purifying Remedial for Chronic corrupt and fetid discharges from Head, Ears and Nose.

71—*Epilepsy Specific*.—An Anti-spasmodic Sedative, which arrests Nervous Irritation and prostration.

72—*Hysteria Antidote*.—A Remedial for this Disease and for Nervous Debility, Irritation and Soreness of the Nerves, Neuralgic pains, &c.

73—*Hemorrhage Specific*.—A Compound Remedial for Internal Hemorrhage, Bleeding Hemorrhoids, Inflammatory or Burning Affections, and Scalding Urine.

74—*Unctuous Remedial*.—For Diseases of the Ears and premature Impaired Hearing.

75—*Hydrophobia and Venomous Snake Bites*.—A powerful Antidote, which must be applied promptly to the wound.

76—*Venomous Composite*.—For severe Gun-shot and Ball wounds, Old Ulcers, Venomous Bites, &c.

77—*Syncopal Restorative*.—For Faintness, Swooning, Asphyxia and Syncope.

78—*Congestion of the Brain and Spine*.—A powerful Specific Compound for speedy effect. A special drink is prescribed to be taken freely, in connection with applications to the Head, Hands and Feet.

79—*Spermatorrhœa Antidote*.—For Seminal and Physical Weakness and Debility, Impotency, Involuntary Emissions, and Unnatural Sexual Passion. It reduces and subdues irrational passion, thereby allowing the system to recuperate. It is a matter for amazement, that some physicians prescribe Mercury and Sulphate of Zinc as injections for this Malady, when their use is utterly destructive to after-health.

80—*Leucorrhœa Repressive*.—A Potent Constringent, for injection and Purification in Leucorrhœa or Fluor Albus, and for Chronic Mucous Discharges.

81—*Gonorrhœa and Gleet*.—A Sovereign Specific, which eradicates these Maladies, and purifies the System. An Injective Medicine, is prescribed as an attendant, to effect prompt suppression. For excessive heat and irritation, make use of the Diuretic Compound alternately with this.

82—*Siphilis*.—This most direful of all Diseases, to which Mercury and other Mineral poisons have been hitherto applied as palliatives, thereby wrecking the constitution by perpetuated disease and corruption, has been met at last by an eradicating opponent. Two most potent Remedials are now used, which possess the positive power to exterminate this Disease, and to purify the system from all its Taint.

A complication of Mercury, when added thereto by the usual false Medical treatment, presents the most difficult phase of this disease, and can only be extirpated by the use of powerful Vegetable Remedials. We can now assure to every patient a permanent relief from all its corruptions.

In consequence of some most virulent cases that have recently come under our charge, where Physicians have, under pretence of cure, inflicted them with the combined disease of Siphilis and Mercury, we deem it our duty to say to the unwary, that among practitioners generally in the cities, Mercury, under its different covert names, is the only Medicine usually given for Siphilis, and it will cost you more pain and expense to get relieved from the Medicine than from the disease. We also assert that it is not in the power of any Medicine known in the Materia Medica, or in the general Medical practice, to eradicate Siphilis and Mercury from the human system, and that the combined Vegetable Extracts we prescribe are the only positive Antidote.

83—*Insanity—Epilepsy*.—Who did sin—this man, or his parents? I shall, on a future occasion, discuss the subject of "Diseases of the Mind," in connection with the gross abuses existent in our Lunatic asylums.

These diseases generally find their cause in debility of some portion of the Mental or Nervous Systems. Bodily Diseases do also sometimes derange the Nervous System, so that the effect finally recoils upon and penetrates the Brain. Inherited Diseases, being in the blood, very frequently produce such a result. It is evident, therefore, that the thorough purification from these Hereditary Maladies, which is effected by Nature's Remedials offered by us, will enable even the Insane to reconstitute their vital and virile powers, and resume their normal mental vigor.

84—*Ephridosis or Profuse Sweating*.—A Specific Remedy to be made into lemonade and drank three or four times daily. For Night Sweats we have a most potent antidote, which is, at the same time, a most efficacious sedative for Typhus and Hectic Fevers, and other Inflammatory Diseases.

85—*Puerperal Fever—Peritonitis*.—This severe malady often termed Child-Bed Fever, develops its power by general inflammation of the Peritonœum, and it has proven very fatal under injudicious treatment. We prescribe for it Remedials prompt in their effect, and which have proven eminently successful.

Hæmaturia.—This is not a distinct disease, but is generated by a basal disease, to which it is necessary to apply the Remedy.

Mercurial Diseases.—Under this title are comprised the various severe Maladies which have been aggravated and perpetuated by the use of Mercury, under the various titles of Calomel, Chloride of Mercury, &c.; and by its admixture with numerous other Minerals and Vegetables, and thus prescribed in pills and in every other conceivable deceptive form. No one Disease to which Man is subject can be compared in tenacity, obstinacy and malignancy to those where this and other Mineral poisons have become combined with the previous Disease. And when Mercury, in any form, has been used to remove a Cancer or Tumor, the case is still worse, as the combination with the blood is then more fully perfected. Some Physicians, attached to the usual Medical Practice, profess the ability to eradicate Mercury, and, also, Siphilis and Mercury combined; but *their averment is utterly untrue*. None of the Minerals or foreign Drugs they profess to use will eradicate these Diseases. It is the Vegetable Kingdom alone that possesses the controlling power to purge the human body from these direful contaminations; and the only two Species of Plants possessing these potent influences belong to our Native Medical Flora, and these are alone known to us and announced among our Remedials.

Paralysis, in its various forms, Palsy, Apoplexy, Neuralgia, Epilepsy, Catalepsy, Locked Jaw, Spasms, Convulsions, Syncope, Paroxysms, Sun Stroke, Chorea or St. Vitus' Dance, Rickets, and other Diseases of the Muscular and Nervous Systems, Distortions and Irregularities of Formation, and persons crippled from birth or by Venereal, Rheumatic, or other Diseases, Spinal Curvatures and other Spinal Diseases—these all require treatment by Electricity or Magnetism.

Electricity and Magnetism.—In order to embrace, in our sphere of Practice, "The Cure of All Diseases," we have had manufactured for our express purpose, *The most powerful and efficient Electrical Batteries, suited to Hygienic Normal Reconstitution*, that have ever been presented to the World. There is none other in the City or in the Union to be compared with these, for their manifold powers over the various Muscular and Nervous Diseases. The application of Electricity is one requiring intellectual study and experience, and must be conducted by a person competent in all respects to its responsible duties. We are prepared to perform all that is necessary on our part to attain the highest and most beneficial results.

Our charge for Electrical application will be a reasonable one, and below what is usually required. In no case will there be any charge for advice, and all Medicines, &c., will be at plain prices and never extortionate.

Diseases in addition to those already named, for which we will prescribe our Remedials.

Apoplectic Fits,	Laryngitis,	Satyriasis,
Arterial Excitement,	Leprosy, or White Scale,	Scabies, or Itch,
Arthritis,	Loss of Memory, (Apply Electricity,)	Scarlet Fever,
Biliousness,	Lumbago,	Sciatic Rheumatism or Gout,
Bilious Colic,	Malignant Tumors,	Scrofulous Ulceration,
Bone Aches,	Menstrual Affections,	Scurvy,
Cancer, Spider,	Mercurial Consumption,	Shattered Nerves,
Cancer, Rose,	Muscular Weariness and Lassitude,	Siphilitic Consumption,
Cancerous Ulcers,	Noises in the Head,	Softening of the Brain (?)
Cholera Infantum,	Nymphomania,	Sprains,
Cholera, Asiatic,	Obstructions,	Stiffened Joints,
Chlorosis, or Green Sickness,	Organic Weakness,	Stricture,
Congestion of Liver,	Osseous Joints,	Struma,
Costiveness,	Pains in Back, Spine and Side,	Swelled Neck,
Depression of Spirits,	Pallor, or Pallid Complexion,	Tetanus, or Muscular Contraction,
Dimness and Dizziness,	Pectoral, or Breast Diseases,	Tic Doleux,
Dropsy of the Limbs,	Piles, Internal,	Tuberculous Diseases,
Dropsy of the Ovaries,	Piles, Scrofulous,	Tumors of the Breast,
Enlargement of Joints,	Pleurisy,	Tumors of the Ovaries,
Emaciation,	Pleuritic Consumption,	Tumors of the Womb,
Epileptic Fits,	Pulmonic Consumption,	Ulcerative Diseases,
Felon,	Prostrate Gland,	Want of Appetite,
Female Breast Swelled Glands,	Putrid Sore Throat,	Weak and Inflamed Eyes,

Gripings,	Rheumatism of the Loins,	Womb—Uterus—Malversion,
Hydrocele,	Rotting of the Bones,	Womb—Uterus—Inversion,
Hypocondria,	Rush of Blood to Head,	Womb—Uterus—Retroversion,
Influenza,	St. Anthony's Fire,	Yellow Fever.
Languor,	Salivation,	

The Liver.—This great Electrical Battery extends its Membraneous influence far and wide, and very many of the most severe diseases commence their development from some affection of this great vital organ. Next to Consumption, Physicians acknowledge that the Diseases of the Liver are the most difficult of cure. A large proportion of the cases of Consumption are developed by a defection of this great organ. How indispensable to our health, then, is it, for us to guard this organ against any impairment of its powers. Most opportunely, Nature, ever conservative, has provided two species of plants possessing potent influences over its life-sustaining organism, with ample power to restore and harmonize any functional derangements.

The Mucous Membrane.—This most important organic tissue extends from the mouth, nose, ears, throat and organs of voice to the Wind-pipe, the Bronchial tubes, and the Lungs, forming a continuous lining throughout, and in their normal state of health the Membrane is constantly moist. Cold or any Inflammation, if not arrested passes from the nose and mouth quite to the extremity of the Membraneous organism. Stimulants which are so frequently and injudiciously applied, often drive the incipient diseases to the Bronchia and the Lungs, and should therefore be avoided. The Antidote we apply is a most calming and soothing one, a simple Vegetable Extract which Nature has endowed with a Specific influence over the Mucous and Medullary Membranes.

Epidemics—There are periods and seasons when certain Diseases assume an epidemic character, and we are occasionally afflicted with some which take a wide range. During the past twelve months Small Pox has prevailed extensively, and for a part of the same period, the Spotted Fever has prevailed alarmingly as a scourging epidemic through the Mining region of Pennsylvania, and in the southern towns of New Jersey. Fortunately we have discovered that a compound of three Anti-scorbutic plants controls and eradicates this disease. Our Article on the "Origin of and Remedial for Spotted Fever," was read at the recent Annual Meeting of the Eclectic Medical Society of New-York.

Hereditary Diseases.—Those who feel interested in investigating the direful effects of Inherited Venereal Syphilis, when perpetuated by marital intercourse, are referred to my "Tour through Mexico," in which country there is a vast district bordering on the Pacific and extending from Acapulco 150 miles inland, the entire population of which consists of the Pinta or Painted Race, their skin on every part presenting the appearance of various colored Calico, this characteristic having resulted from the perpetuity of Scrofula through many generations.

ANCIENT AND MODERN PATHIES.

Allopathy has held its sway from a very ancient date, and its *modus operandi* is too well known to require any comment. I think it but rational to concede that its doctrinal basis is such as would first be adopted in the primitive condition of mind; but its sole claim to present toleration consists in its antiquity and in the cherished adherence of its votaries to the belief that it was and is founded on a Scientific basis.

Homœopathy, which was first authoritatively announced only about thirty-five years ago, and which in the present state of mental development would appear to be the sole Natural basis of all Therapeutics, has been constantly advancing its ascendancy over its stalwart and arrogant predecessor; but its infinitesimal doses need revision, and its rejection of all Mineral antidotes should be assured.

Hydrophathy—Water Cure—which possesses its own peculiar merits, has been most unduly puffed by its adherents, who have claimed for it controlling powers which they now find do not appertain to it; but they have been especially zealous in turning these pretended claims to profitable account. It possesses very salutary influences within the limits of its own special sphere, but beyond these it is utterly impotent, and has proven a positive failure, as the mass of disappointed patients on all sides assure us. It has arrogated to itself the combined benefits derived from the Motor Cure and from Diet, when these are with equal benefit combined with any other Pathy. Water Cure, in Consumptive cases, has proven an utter failure, and it is entirely nugatory in all the chain of Inherited and other Scrofulous Diseases of the Blood. The idea of eradicating these Constitutional Diseases with Water Cure applications, is just as effective as would be the cleansing of a churn filled with excrement, by scouring the outside of it.

Magnetism and Electricity.—The ancient doctrine of the Therapeutæ of Egypt and of their successors elsewhere, including the Essenians and the Christians of Judea—of curing Diseases or “Casting out Devils,” which were synonymous, by “Fasting, Repentance and Prayer, and *The Laying on of Hands*”—was none other than Magnetism, the success of the operation being dependent on the positive Magnetic power of the operator, and on the negative recipient condition of the patient. The same application of Magnetism is equally successful at the present day, and is now combined with the application of Electricity, they being phases of the same eternal principle. As a most potent remedial capable of controlling the Muscular and Nervous systems, where no medicine can reach, they occupy a position of primary importance, and a vast field for beneficial results in the correction of deformities and in controlling and harmonizing the electric forces of the human system, which we, as yet, have only begun to realize, and of whose magnitude we have no present conception. And when we recognize this subtle and all pervading principle, as the empyrean power by which God controls the evolutions of the Universe, and by which he has developed the life of the countless myriads of sentient beings, and all other animate and inanimate existences, we may hail with joy its benign recuperative power over the life and the health which it has bestowed. And having so often witnessed the inspiring fact, that when all Nature languishes, and Man’s Vital energies become faint and powerless, let the bright Artillery of Heaven begin to play and send forth its Electric purifying beams through our atmosphere, and how quickly will all reanimated Nature and every man, and beast, and plant, resume their life and vigor. Such is the mighty element which God has now revealed to Man, to prolong the life and health of his children.

Motor Pathy.—As exercise, is one of the most natural and healthful pursuits, it needs no strain of our faith to realize that its scientific practical application must impart great benefit to the system, and prove eminently recuperative where inactivity, lack of energy, or some malady has relaxed or diminished the natural powers of the body or limbs.

Alcohol Pathy.—We have recently noticed in some Allopathic Medical Journals, the adoption and recommendation of Alcoholic prescriptions for several Diseases. Whisky is therein recommended as a cure for, and a preventive of, Diphtheria, an affection of the Mucous Membrane; and some physicians have asserted that “Alcohol is food.” I desire simply to remark that a course of practice so injudiciously applied, and so contrary to the normal recuperative consistencies of the human system, cannot fail to be deleterious in its results.

Astrology.—Which was combined with the healing art in the primitive ages, and is occasionally revived by some pretenders to delude the ignorant—exerts no power whatever over human diseases; and but few persons are now to be found so idiotic as to yield faith to the special virtues of plants gathered under planetary influences, or to any other occultations connected with the starry host.

In the preceding review of the diverse Pathies, we trust that we have exercised candor and not severity of judgment; and so far as what is termed the “*Regular Medical Practice*,” we will quote the opinions of some of their own Faculty.

Prof. A. H. Stevens, M. D., declares: “The older physicians grow, the more skeptical they become to the virtues of their Medicines.”

Prof. Evans says: “The Medical practice of the present day is neither philosophy nor common sense.”

Prof. Willard Parker says: “Of all Sciences, Medicine is the most uncertain.”

Prof. Gregory says: “Ninety-nine out of every hundred Medical facts are Medical lies.”

Dr. Bostwick, author of “History of Medicine,” says: “Every dose of Medicine is a blind experiment.”

Dr. Frank says: “Thousands are annually slaughtered in the sick room.”

We could greatly extend similar quotations.

Nature’s Pathy.—The Pathy or Doctrine of Nature, must be that which God himself has ordained, and which Nature has perfected. It must be absolutely true in itself, impressed with divine power, potent in its influence and consummate in its results. The intellect of Man was given him that he might comprehend Nature’s bounds and her inevitable laws, and he received wisdom to guide him in their adoption. Uninstructed but unprejudiced Common Sense has made the mightiest strides towards truthful solutions and revealments. We hail the developments of a Brilliant Eclectic Era in Medical Science, whose radiations shall completely revolutionize the Medical Practice of the World. And in its universal adoption, we have only to give consideration to the fact, that where God and Nature placed the food and sustenance of Man, they also placed the Remedials for his Maladies. And as a finale, we may now bid adieu to the Medical Delusions and Vagaries of bygone ages, and to the Ancient Pathies, whose flickering shades still linger around us, whilst we may enjoy the consolatory reflection that their expiring light entails no loss on humanity. Every Pathy or Sect of Physicians, Astronomers, Religionists or other Professors, who still bind their minds in a blind adherence to some Ancient Creed, whose only present claim is founded upon its age and its ambiguity, can aspire to no advance in intellectual development, beyond the darkness and ignorance which enshrouded the age in which that Pathy or Creed was promulgated.

This Inquiry, we think, may soon be made by Humanitarians. As there are some physicians so unqualified by Nature and so prejudiced by education, that they continue to reject all light and reformation, it must soon become a question by all Humanitarians, how far shall these physicians so incapacitated be permitted to insult the public intelligence, by a refusal of all fair investigation of the merits of the great Natural Remedials which the Bounteous Vegetable Kingdom has presented to mankind. And how much longer will Intelligent Society permit the masses to be stricken down and butchered "*Secundum Artem*," by a Medical Practice, not only ignorant and senseless, but which destroys indiscriminately the adults and the infants by its direful imbecility.

Then let us no longer linger amid the beclouded wilds of dark, bygone ages, but let us hail the glorious present as the era of mental progress and disenfranchisement. The great State of New-York may be justly entitled, *The Moral Centre of the Intellectual World*. The City of New-York is now rapidly assuming her destined position as the *Mightiest Commercial Emporium* of the Earth, thus leaving London and the other cities of the East to their destined decline and decadence. It is, therefore, most rational, that from this spot, so favored by Nature, where Destiny shall long continue to record her annals of succeeding ages, there should emanate the glorified beams of Hygienic and Therapeutical light, which are destined, in their radiations, to send forth a living stream of Illuminated Truths to the remotest regions of our globe, by which they shall restore to the human body in every clime its normal constitutional health, and thereby enable it to sustain the expanded powers developed by the present mental disenfranchisement.

PERIOD FOR CURES AND EXPENSE OF MEDICINES.

Our purpose in prescribing for patients is to give such Medicine as will eradicate the basal disease. We have an aversion to all palliative remedials; neither do we desire to hasten cures by patching up Diseases, however anxious the patient may be on that point. Nature must have ample time for organic recuperation. Light and sudden maladies may be speedily retrieved, but the severe Inherited and Chronic or Constitutional Diseases, which have become deeply rooted throughout the system, will require an ample period for the searching operation of such powerful Remedials as are necessary to penetrate and purify every part and fibre of that system, to entirely eradicate the disease, and to reconstitute the debilitated organism of the human frame. Such terrible Diseases cannot be cured hastily. Those, therefore, who prefer haste to health must apply elsewhere. In regard to expense, the common class of Maladies can be cured at a cost, for Medicines, of \$3 to \$5; but Consumption, Dropsy, Cancer, Erysipelas, Syphilis, Liver, Kidney and Heart Diseases, and such others as are of a Scrofulous, Inherited, or Chronic character, will usually require a prolonged period and a proportionate expense for Medicines. We certainly have no desire to enhance the cost, but an appropriate liberality on the part of the patient is indispensable. Physicians, as a rule, in violent Diseases, usually exact a fee of \$20 to \$50 for advice, whereas we claim nothing therefor.

Palliatives.—The public mind has been so grossly imposed upon by the use of temporary remedies, and by the pretences of immediate cures, that invalids have become impatient and unwilling to await the period of time necessary for positive recuperation. We are no advocates of temporary expedients, nor shall we prescribe such in any case to our patients. Persons, therefore, who are content to be misled by specious professions of immediate cure, had better apply elsewhere. Our object is a radical and perfect restoration in every case, by an entire purification of the human system, and we expect the patient to await with patience such a desirable result. We acknowledge that we feel a passion and an anxiety to perform a prompt cure, quite as strong as the patient can himself feel. Possessing an ardent will power and a potent magnetic control, these would seem to impart some predominating influence over the disease itself.

Diet.—This is a point of important consideration to invalids. It is utterly useless for any one to take Medicines, if they adopt a course of living which entirely counteracts their influence. In adopting any course of Medicinals, it is requisite that the normal recuperative powers be allowed their full operation. No Alcoholic liquids, or other Excitements, must be used, but pure Wines are admissible. No pork or grease, and no Cayenne Pepper should be used. It is claimed that the great consumption of Pork at the West develops latent Scrofula, and that Pork is the cause that so many phases of Scrofula exist there, where it takes the form of Glandular Swellings, Prairie Scratchings, (Itch,) &c. Simple meats and simple drinks should comprise the food of patients. The more simple, the more favorable to the operative influence of the Remedials which the body receives.

MEDICAL FRAUDS AND DECEPTIONS.

Having already presented my claim to the general adoption of my Plant Remedials, based on my Botanic studies, and on the life-long knowledge I have acquired, of the Specific powers of the Vegetable Kingdom over Human Diseases, I deem it my concurrent duty to warn the public against all pretentious deceptions in regard to Vegetable Medicines. At the present time, when Nature's Remedials from plants are so rapidly acquiring favor, and becoming so generally popular, I have noticed that some City Physicians announce Vegetable Remedials, when, in fact, they are giving their patients only fictitious Mineral Compounds. I do not crave the office of denouncing these fraudulent practitioners, but I shall not shrink from so imperative a duty; and I may here remark that I detected the fact that a Medicine which has been very extensively sold in New-York as "Iodide of Potassium," a somewhat popular medicine, is in fact a deleterious Mineral Compound of Mercury and Salts of Iron—a combination which serves to palliate some maladies for a time, but deposits in the system the seeds of future ruinous disease.

But the most prominent instance of gross deception is that of the professed "Howard Association of Philadelphia," the legitimate Institution having been long defunct. It appears that a man who stiles himself M. D. has usurped the defunct title of this formerly Charitable Association, and has published under its respectable name several Pamphlet Circulars, which he advertises extensively for gratuitous distribution, under the pretence that this "Benevolent Institution for the relief of the sick and the distressed" is giving "*Medical Advice Gratis to protect the unfortunate.*" I ask any one to take the pamphlet, headed "NEW REMEDIES," and peruse it with me. These New Vegetable Remedies (it states) are employed "in Diseases of the Generative and Urinary Organs, Seminal Weakness, Constitutional Diseases," &c. Twelve Species of Plants and Trees are named

and described most speciously and freely, as constituting these "New Remedials," which are most assumptively claimed to take precedence of all others as possessing miraculous powers. But what will you think, when I, as a botanist, tell you the astounding fact, that this whole chain of names is a tissue of fraud and deception. Of eight of these Names, there are no such Genera on the Earth, and of four others there are no such Species on the Earth, and, of one more, the tree is unattainable. I give the names, that every one may examine for himself as to this gross fabrication. :

Oxonis nigrum,
Spinosus erecta,
Agaria Vesica,

Eulema Striata,
Daphne incarnata,
Padus Canadensis,

Salernus alba,
Virnum aromatica,
Padus Canadensis,
Amanite, or Cooling Spurge,

Actæa Cerebus,
Jacaranda Caroba,
Cedron.

This fraud of deceptive names is for the purpose of causing invalids to seek in vain elsewhere for these spurious Remedies, and thereby force them to apply to these pretended benefactors for relief, thus securing the pelf for their own pockets. I am now informed by several eminent Philadelphia Medical Professors, that all the names attached to these pamphlets as President, Secretary, and Consulting Physicians are arrant forgeries, and that no such persons have ever lived in that city and that "the whole is an outrageous swindle." I now call upon the respectable Medical Institutions of Philadelphia to stamp this pretended Howard Association with the stigma it merits. We exposed in a previous edition similar fraudulent pamphlets, with spurious and fictitious names of physicians, issued under the name of Scott & Co., Broadway, New-York, denounced them for selling a spurious Article under the name of my Veronica Quinquifolia. I shall continue to expose similar pretentious deceptions in Medical Practice in each new Edition of this Treatise.

SOME GENERAL REMARKS.

Our purpose in advancing the views we have presented in this short Treatise, has been for the object of presenting the strong grounds on which we claim a Revolution in Medical Practice, and like most other men, we anticipate for ourselves a favorable and beneficial result. But we do also claim as coincident therewith, the higher purposes of usefulness and benevolence to the afflicted and the sorrowing. And whilst we combat, in behalf of our own position and our own views, we will always be ready to extend the hand of fraternal regard, alike to all brethren of every Creed and Doctrine, who will adopt an equally liberal course.

We court a friendly coöperation with all who exercise independence of thought and action, and who are ever awake to the luminous dawn of newborn light. We solicit the combined efforts of all the votaries of progress in favor of such a reformation as shall impart enhanced blessings to mankind. The period of miracles is passed, as the dilatations of the human intellect now hold pre-eminent sway, and have bid miracles to cease.

It would indeed seem that the highest bliss of an intelligent mind, is that empyrean attraction which unveils the hidden treasures of Nature. Science is not only a power, but there is an intense delight attendant on those minds which are devoted to its acquisitions. Another great enjoyment worthy of progressive Man, is the universal exercise of humanitarian benevolence, thereby healing the sorrows and soothing the afflictions of the poor and the friendless. We may thus invoke the exercise of all the brightness of intellect with all that is pure and benign—the representative attributes of God—Wisdom and Love. Truly indeed! may we then exclaim, The perfection of Wisdom and Knowledge is not only power, but bliss also.

LIFE AND DEATH.

Although it is always a rightful duty to preserve life for the fulfilment of our Earthly Duties, yet those who are afflicted with incurable diseases possess this vast resource for reflective consolation, that their passage hence is only from a region of physical infirmities and solitudes, to the bright and glorious abodes of mental purity and bliss.

And, after all, what is this transitory, preparatory life, compared to an eternity of glorious progress in knowledge and in bliss?

'Tis less than the flower of a day, when contrasted with the gigantic Oak of myriads of ages!

'Tis less than a span, compared with the mighty arch of the Heavens!

'Tis like the dew-drop, when contrasted with the mighty Oceans, whose waters encircle our Globe!

'Tis like the dim flickering of a taper, when contrasted with the dazzling rays of myriads of Suns! or with the Eternal Effulgence which is ever radiating from the throne and the presence of God!!!

DIAGNOSES AND PRESCRIPTIONS.

It is desired, and will be deemed indispensable, that each applicant who desires the exercise of our discretion in the selection of Remedials, shall send us a full history of the origin and present symptoms of his disease, whether it was inherited, how long existing, his age, complexion, occupation, habits, previous and present bodily condition in all respects, and any previous medical treatment. Also, whether his parents and family have been subject to any particular disease—the whole to be written out distinctly on a special sheet.

This information is indispensable to the selection of appropriate Remedials, and the recovery is mainly dependent upon its accuracy. It oftentimes occurs, that Nature will speak through the invalid the best thing that can be done for his relief, and whatever appears to him to be an imperative demand, should be heeded.

NOTE.—All Advice will be imparted gratuitously, either personally or by letter.

T E R M S .

Prices of the Remedial Fluid Extracts.—All these are in bottles of 4 ounces at \$2, 6 ounces at \$3, and of double size or strength at \$5 each. Treble Extract of Scrofularia, of great concentrated power, \$8 per bottle. This last will sweep from the system the most direful and obdurate Inherited Diseases, some of which withstand the power of the ordinary Extract.

Powdered Roots and Solid Extracts.—Scrofularia, Veronica Quinquefolia, Diphtherica, Pilewort, Rheumatic and Fever Specifics, and nearly all other Remedials, can be sent as above in packages: 3 ounces, \$3; 6 ounces, \$5; 9 ounces, \$7.50; and 12 ounces, \$10.

NOTE.—Special Directions will be sent with each Medicine, with all particulars as to the number of doses, quantities, &c.

☞ Our Legal Rights to these Remedials are secured in the United States District Court.

FORWARDING.—The Fluid Extracts will be sent by Express, and the Powdered Roots and Solid Extracts by Mail, at the present low postage, on receipt of remittance; or, if so ordered, the bill will be sent by Express with the package, payable on delivery.

☞ Stamps must be sent when Replies or Pamphlets are desired.

REMARKS.—Some persons may expect larger Bottles for the prices than we offer. To such we state, that these are *pure concentrated* Fluid Extracts of great power, and possess more virtue than quarts of common mixtures. If we adopted the course that is pursued with the trash generally sold, we could, by the aid of our pump, supply bottles of any size for \$1, or six of them for \$5, as usually announced. Our Concentrated Medicines require that water be added by the patient when taking them.

Location.—Flushing is located at the head of Flushing Bay, (East River,) and is the most beautiful and thriving village in the State. From New-York you cross East River by the Ferry at Thirty-fourth street, when the Railroad runs to Flushing in thirty minutes, which is a shorter time than is usually required to traverse New-York on any business.

My Residence.—My permanent Residence has always been, and still is, at Flushing, and I have given up, during the Summer season, my Rooms in New-York, but Visitors can reach me here in thirty minutes.

REMEDIALS—WHERE OBTAINABLE.

The Remedial Medical Plants are grown in the grounds belonging to Prince & Co., and occupied by their Linnæan Gardens and Nurseries, at Flushing, Long Island, New-York.

These Eclectic Remedial Medicines are prepared under the supervision of Wm. R. Prince, now sixty-eight years of age, who has withdrawn from all business, and devotes himself exclusively to their preparation. The knowledge of the potent Therapeutic Virtues of these combined Remedials has been the result of long-continued investigations, unceasing toil and study, countless experiments, and an ardent devotion to humanitarian renovation.

They can only be obtained *genuine*, by direct application, personally, at my residence at Flushing, or by letter, or through an especially authorized Agent possessing written power to act.

Agencies.—We have been urgently applied to, to establish Agencies in many of the Cities and large Towns, but have deferred them, as so many points have to be duly considered. Our great desire is to insure to patients our identical prepared Remedials, without the possibility of adulteration or mistake, as we assume the entire responsibility as to the beneficial results.

But with the increasing demand, we shall be necessitated to establish Agencies in the large Cities and Towns, and especially in distant States. We will, therefore, for the future, be willing to enter into arrangements with responsible persons as Agents to receive orders, and the Medicines will be sent through them. A liberal Commission will, of course, be allowed. We send out no Medicines for sale, and only in fulfilment of orders; and any offered by pretended venders, pedlars, etc., are spurious.

Physicians, Health Institutes, Water Cures, Hospitals, Asylums and other Public Institutions, will be supplied in quantity at a liberal discount. The poor of this Island and vicinity have hitherto received our Medicines gratuitously, and such will ever be our continuous practice.

Medical Superintendence.—Although in all ordinary Medical applications advice will be imparted gratuitously, we shall make exception when we are desired to take especial superintendence of any severe Diseases, that will necessarily absorb much time, and much reflection and responsibility, such as Consumption, Cancer, severe Scrofulous, Siphilitic, and other Inherited and Complicated Diseases. We will expect in such cases a fee of \$10 to \$25, or more, according to its importance, and to the time to be devoted.

Notice to the Humane.—The persons to whom this pamphlet is sent will please forward the names of any persons laboring under either of the diseases named, and they will receive in return some valuable document.

Trees, Shrubs, Roses, Poenies, Bulbs, and Plants.—Catalogues of the Various Nursery Departments will be sent when desired, on receipt of a red postage stamp for each one of the six that may be applied for.
